27th Annual Dental Special Through April 2019

We are participating in Dental Health Awareness by offering our 2th Annual Dental Special. It's an excellent value for owners and a medical necessity for pets. We are excited to be able to offer it again this year.

Studies prove that 80% of all pets over age of three have periodontal disease and need immediate dental care. The bacteria in the mouth causes bad breath and gum disease locally but they also spread to the intestines, liver, heart and kidneys causing premature deterioration of these vital organs. Professional dental cleaning and treatments, coupled with proper home care, will give your pet a healthier and longer life.

The doctor will examine your pet and a blood test will be run to check for any potential problems prior to scheduling your dental. By examining your pet prior to anesthesia, doing blood tests to check organ function, and using the safest anesthetic available, the risks of anesthesia are minimized. Your pet's teeth are cleaned to remove plaque and tartar, particular attention is given to "hidden" problems under the gum line. The teeth are then polished for a smooth finish. Your pet is discharged on the same evening with better smelling breath, and more importantly a healthier and more comfortable mouth.

\$250 Discount

Description	Regular Fee: Canine	Regular Fee: Feline
Comprehensive Exam	\$64.00	\$64.00
